SWISS HOPE SHERPA

Current projects...

OUR VILLAGE CHHESKAM

Both family houses are finished, the families have moved in and are incredibly happy to have a beautiful and safe house.

THE BUILDING OF THE SCHOOL LIBRARY AND COMPUTER ROOM

During the Lock Down, Pasang walked to Chheskam to move on with construction. Nobody in Nepal could work during this time. That is why it was important to us that we could employ some people from the village and that they would have an income. The locals did a great job and built the building in no time.

Since the government is continuing to build the road, it has already arrived in Chheskam. It now leads exactly through the children's sports field. We spontaneously decided to renew the sports field.

NEW CHILD SCHOLARSHIP

Thanks to a private donor, we were able to add a new child scholarship. So we support 3 families so that their children get the best possible education.

Pemba Sherpa would like to become a doctor one day.

CORONA SITUATION:

As well as the trekking season and the mountaineering season are cancelled in spring. Which is a catastrophe for the country economically. Because 90% of the locals live from tourism. The state does not have enough money to help people. Fortunately, they can plant vegetables, grains and potatoes up to higher altitudes themselves. It is hoped that at least a few tourists will come for the autumn trekking season.

Not much is known of the corona numbers as doctors in the country don't have tests. A few Swiss people went to Nepal with a few tests, but these were soon used up.

A THANK YOU

To all who believe in us and give us the confidence in Nepal, especially in our village Chheskam, to give a little hope.
